Career Objective

Motivated engineering student seeking an internship to gain practical experience, improve technical skills, and contribute effectively to organizational goals. Seeking an internship position to utilize my programming and analytical skills in Python and AI/ML while learning from industry professionals and contributing to innovative projects.

Experience

Worked as an intern gaining hands-on experience in Python, Machine Learning, and Deep Learning concepts through real-world projects. Collaborated with mentors and team members to design, develop, and optimize AI/ML solutions following structured development practices. Applied problem-solving and analytical skills to implement efficient solutions and improve model performance.

SmartBridge Educational Services | Sep 2024-Nov 2024

Education

Btech-Computer Science Engineering(AIML)

Siddhartha institute of science and technology(Puttur) | 2023-2027(Pursuing)

Intermediate-MPC

Sree saraswathi jr.college(Guntakal) | 2021-2023

SSC-10th

Rotary EM High School(Guntakal) | 2020-2021

Skills

- Python
- Java
- C-Programming
- ML(Basic-Level)
- HTML
- CSS
- Javascript

Projects

POLLEN GRAIN CLASSIFICATION

- *Worked on Pollen Grain Classification using Machine Learning and Deep Learning to identify pollen species from microscopic images.*
- *Implemented image preprocessing and CNN-based models to train and evaluate classification performance. Gained practical experience in Python, TensorFlow/Keras, OpenCV, and collaborative project development.*

FACE DETECTION SYSTEM

- Developed a **real-time face detection system** using **Python and OpenCV** with Haar Cascade classifiers.
- Implemented **live webcam-based detection** to identify and locate human faces with bounding boxes.
- Optimized detection accuracy by **preprocessing images using grayscale conversion** and tuning detection parameters

Certifications

- TCS ION Career edge-Young Professional (TCS ION, 2025)
- Certificate of Participation by Unstop (UNSTOP, 2025)
- Advanced Course on Full Stack Development (Orion Grid, 2025)
